Shigeto Yamawaki M.D., Ph.D

President of CIMP (2014-2016)
Honorary President of AsCNP
Professor and Chairman Psychiatry and Neuroscience
Hiroshima University, Japan

Dear Friends and Colleagues,

On behalf of the College of International Neuropsychopharmacology (CIMP), I would like to extend my warmest congratulations to the 2015 joint Congress of AsCNP and TSBPN, and my sincere appreciation to Dr. Tung-Ping Tom Su, President of AsCNP, and Dr. Chia-Yih Liu, President of TSBPN, for organizing such a special Congress in conjunction with the WPAIC 2015 and the 4th Asian Congress of Schizophrenia Research(ASR) in Taipei, Taiwan.

We all recognize mental health issues have become challenges worldwide in the time of globalization and informatization. Psychiatry has covered a wide range of fields such as psychopathology, biological psychiatry and social psychiatry, and it has provided a wide variety of treatments for mental disorder including pharmacotherapy as well as psychotherapy and rehabilitation. But there are still increasing unmet needs in the area of mental health. Pharmacotherapy has been undoubtedly important in this area, but today the innovation for new CNS drugs integrated with neuroscience is anticipated to solve the unmet needs urgently.

AsCNP, which was established in 2008, will have its 4th biennial Congress this November.

I hope AsCNP will keep playing a significant role for mental health in Asia and make a more contribution to the development of neuropsychopharmacology.

Finally I wish a great successful Congress and look forward to meeting you in Taipei.

Shigeto Yamawaki
CIMP President

Tung-Ping Su M.D.

Professor, Division of Psychiatry, Faculty of Medicine,
National Yang-Ming University
President, Asian College of Neuropsychopharmacology

Welcome Remarks

On behalf of the Asian College of Neuropsychopharmacology (AsCNP), I have the great honor and pleasure to welcome colleagues from across Asia to Taipei to join the 4th Biennial Meeting this year, in 2015. This congressional meeting will be held jointly with World Psychiatric Association International Congress 2015 (WPAIC), and the 4th Asian Congress of Schizophrenia Research (ACSR).

The mission of AsCNP is to encourage research, to facilitate interactions between basic and clinical neuroscience, and to make an innovation and development of pharmacotherapy in the field of neuropsychopharmacology. Since its founding in 2008, the AsCNP Congress has been held across Asia—in Kyoto, Japan, Seoul Korea, and Beijing, China. All of these congressional meetings were very successful, filled with fruitful discussion and communication and actions that have moved the organization steadily towards the goal of its mission. At this 4th AsCNP meeting, we will have 15 symposia covering major depression, bipolar disorder, schizophrenia, and substance abuse. Other content to be covered includes translational research from genetic to clinical phenotypes and brain imaging and psychopharmacoepidemiology across Asian countries, as well as new psychiatric drug development such as GWAS study and single low-dose ketamine infusion in refractory depression.

Very excitingly, over 70 posters have been submitted from countries across the world: Japan, Taiwan, Korea, Indonesia, India and non-Asian countries including the USA and Denmark. We really appreciate the incredible contribution of and devotion from our members to making this meeting a success.

I am honored to be your host and welcome you to my home. Taipei is a beautiful city—with amazing architecture like Taipei 101, some of the world's best foods, and, I am told the friendliest people in the world. We hope to add to that list a central Asia player in the development of breaking edge research in Neuropsychopharmacology. Enjoy the city, and welcome to the 2015 AsCNP.

Tung-Ping Su, MD
President

Asian College of Neuropsychopharmacology
November, 10, 2015

Winston W. Shen, M.D.

President-elect,
Taiwan College of Neuropsychopharmacology
Professor and Chairman Emeritus, Department of Psychiatry,
Taipei Medical University

The Welcome Message to the Meeting of The Asian College of Neuropsychopharmacology

Dear colleagues,

It is a great pleasure for me to welcome you at the meeting of the Asian College of Neuropsychopharmacology (AsCNP), November 20-22, 2015.

As you have noticed, the meeting of the AsCNP is only a part of the World Psychiatric Association International Congress Taipei, November 18-22 (WPAIC 2015). Totally, 12 AsCNP symposia are distributed on Friday, November 20; Saturday, November 21; and Sunday, November 22.

Three 90-minute symposia on biomarkers for depression, treatment-resistant depression, and adverse effect of the second-generation antipsychotic drugs will take place effective 16: 00, Friday, November 20.

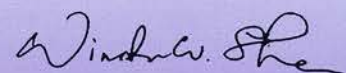

Six symposia on advanced research in bipolar disorder, negative emotion in schizophrenia, and addiction patients with complications as well as substance use disorders, experimental treatment for depression, and brain function and antipsychotic drugs are scheduled in the time slots effective 8: 30 and 16: 00, respectively, Saturday, November 21.

Three more symposia on new psychiatric drug development, genome-wide association studies in psychiatry, and ketamine for depression are on the program effective 8: 30, Sunday, November 22.

Finally, Prof. Shigeto Yamawaki, the first president of the AsCNP will give a lecture at 10: 30, Sunday, November 22. His topic is "Toward the Future of Psychiatric Diagnosis and Therapeutics: From Neuroscience to Mental Health."

I thank Tom Su, Chia-Yih Liu, Shi-Ku Lin, Cheng-Ta Li, Grace Huang and others, for all the help in organizing the meeting of AsCNP. I also thank members of organizing committee and scientific program committee of the WPA IC, Taipei, 2015 for their kind and generous accommodation.

Do enjoy the scientific program of the AsCNP and sight-seeing in Taiwan!

A handwritten signature in black ink that reads "Winston W. Shen". The signature is fluid and cursive.

Winston W. Shen, M.D.
President-elect,
Taiwan College of Neuropsychopharmacology
November 9, 2015

Shih-Ku Lin, MD

Chairman of the Congress
Professor, Taipei City Psychiatric Center
and Taipei Medical University

Dear Friend and Colleague,

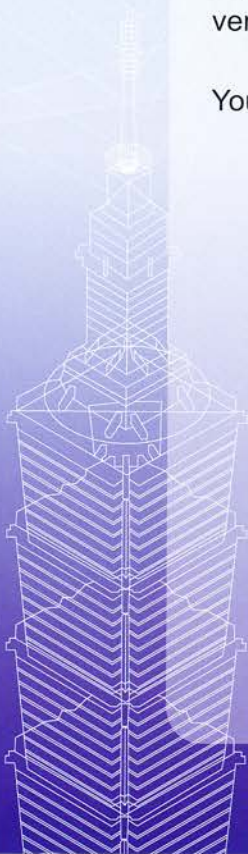

On behalf of the Organizing Committee, it is my great honor and pleasure to welcome you to Taipei and to the 4th Congress of Asian College of Neuropsychopharmacology, joint with WPA International Congress 2015.

Our scientific program will begin with the Keynote Lecture by Dr Licinio, Chaired by Dr Yamawaki at 14:00 Friday, 20 November and end with the Keynote Lecture by Dr Yamawaki, Chaired by Dr Su at 10:30 Saturday, 22 November. In between we have 12 symposiums with 47 speakers from different Asian and western countries. The topics cover from basic researches to novel clinical trials. Also we have 63 posters with a variety of research topics. The participant can also attend the WPAIC programs, which has a very florid lectures and symposiums, including psychosocial and educational themes. Through this Congress, we believe that the interaction with new friends and old friends will stimulate future collaborations, not only from different field, but also from different countries.

Taiwan locates in the heart of Asia Pacific. Taipei is the heaven for gourmets. We hope that you enjoy the Congress and also trust that you will enjoy your visit to the very beautiful and exciting city of Taipei.

Yours sincerely,

Shih-Ku Lin, MD
Chairman of Organizing Committee

Time\Day	Friday, November 20	Speaker	Title
14:00-14:30	AsCNP Opening Remarks	Tung-Ping Su Shih-Ku Lin Shigeto Yamawaki	
15:00-15:30	Keynote Lecture 6	Julio Licinio	Precision Medicine Approaches to Depression: The Role of Pharmacogenetics
15:30-16:00	Coffee Break (Carridor, 1F)		
16:00-16:30	S060-AsCNP Symposium		<ul style="list-style-type: none"> Identifying Biomarkers of Diagnose and Treatment Outcome in Depression: Task Force of Chinese Depression Research

08:30-08:30	S105- AsCNP Symposium		<ul style="list-style-type: none"> Ketamine, A Rapid-Acting Antidepressant Agent, in Treating Resistant Depression in Taiwan: From Neuropharmacology, Clinical Trial,
			<ul style="list-style-type: none"> Brain Imaging to Animal Model Development
10:00-10:30	Coffee Break (Carridor, 1F)		
10:30-11:00	Keynote Lecture 9	Shigeto Yamawaki	Toward the Future of Psychiatric Diagnosis and Therapeutics: From Neuroscience to Mental Health
11:00-11:30	TSBPN Election(201F, 2F) (領/投票) 13:00 (開票)		
12:00-12:15	AsCNP Closing Remarks	Xin Yu, Yen-Kuang Yang, Tung-Ping Su, Andi J. Tanra	
12:15-12:30			

Introduction of AsCNP

The Asian College of Neuropsychopharmacology (AsCNP) was founded on October 1, 2008 in Tokyo after many enthusiastic discussions in several preparatory meetings. The mission of AsCNP is to encourage research, to facilitate communication of ideas in the convergent disciplines of neuropsychopharmacology in Asia, to make an innovation and development of pharmacotherapy in the treatment for psychiatric disorders, to provide education and training opportunities and to empower the patients and their families with professional knowledge.

The International College of Neuropsychopharmacology (CINP) founded in 1957 has been a leading international organization and made a large contribution to the development of neuropsychopharmacology globally in research as well as education. Subsequently the American College of Neuropsychopharmacology (ACNP) and the European College of Neuropsychopharmacology (ECNP) have been established in 1961 and 1987, respectively. In Asia, a huge number of patients are suffering from psychiatric disorders, and the prevalence of mental health problems such as depression, suicide, alcohol and substance abuse and dementia from children to elders increasing, therefore the AsCNP has been expected to be founded for many years.

Under Professor Shigeto Yamawaki, Founding President, the first AsCNP Congress was held in Kyoto, Japan on November 13-14, 2009. Under Professor Young Hoon Kim, the 2nd AsCNP President, 2nd AsCNP Congress was held in Seoul, Korea on September 23-24, 2011. Under Professor Xin Yu, the 3rd AsCNP President, the 3rd AsCNP Congress was held in Beijing, China on September 12-14, 2013. All of these congresses were very successful with fruitful discussion and communication.

The AsCNP has been recognized so rapidly. The ACNP Presidents have organized the leadership meetings of CINP/ACNP/ECNP/AsCNP in 2010, 2011, 2012, 2013, and 2014 and requested AsCNP delegates to introduce the AsCNP activity every year.

The 4th AsCNP Congress will be held jointly with World Psychiatry Association in Taipei, Taiwan on November 21-22, 2015 under Professor Tung-Ping Tom Su, AsCNP President-elect. The 5th AsCNP Congress will be held in Bali, Indonesia on September 28-30, 2017 under Professor Andi J Tanra.

AsCNP has society-base and individual-base membership systems. Currently, there are 7 societies or branch as follows:

Taiwanese Society of Biological Psychiatry and Neuropsychopharmacology (TSBPN)

Branch of Neuropsychopharmacology in Chinese Society of Psychiatry

Korean College of Neuropsychopharmacology (KCNP)

Japanese Society of Neuropsychopharmacology (JSNP)

Japanese Society of Clinical Neuropsychopharmacology (JSCNP)

Indonesian Society of Biological Psychiatry and Psychopharmacology

Philippine College of Psychopharmacology (PCPsych)

Regarding individual membership, 4 researchers from Thailand, India, Singapore and Canada are AsCNP members.

AsCNP welcome neuropsychopharmacologists along with psychiatrists, neurologists, in Asia and the other regions to join AsCNP and its activities either by individuals or by societies.

AsCNP President

Tung-Ping Tom Su
